

Cost Effective Implementation Of The New Real-Time System Management Information Program (RTSMIP)

ITS Tennessee

September 29, 2011

RTSMIP – The Early Days

- Section 1201 of SAFETEA-LU (signed by Pres. Bush August 10, 2005) “requires the Secretary to establish a RTSMIP that provides, in all states, the capability to monitor, in real-time, the traffic and travel conditions of the major highways of the United States and to share these data with State and local governments and with the traveling public.”

RTSMIP – Now A Rule!

- 23 CFR Part 511 effective December 23, 2010
- Interstates shall be completed no later than November 8, 2014
 - 20 minutes or less reporting
- State-designated metropolitan area routes of significance shall be completed no later than November 8, 2016
 - 10 minutes or less reporting
- Metropolitan areas (MSAs) greater than 1M population
 - Nashville-Davidson–Murfreesboro–Franklin, TN
 - Memphis, TN-MS-AR

RTSMIP – The Details

- Eligibility for Federal funding
 - Planning, deployment and operation, including preventative maintenance
 - National Highway System (NHS)
 - Congestion Mitigation and Air Quality Improvement (CMAQ)
 - Surface Transportation Program (STP)
 - Development and implementation
 - Statewide Planning (SPC)
- Match
 - Solely for Interstate – 10% (90% Federal share)
 - Non-Interstate highways – 20% (80% Federal share)

RTSMIP – The Details

- Provisions for traffic and travel conditions reporting
 - Minimum requirements
 - Construction activities that close or reopen roadways or lanes
 - Roadway or lane blocking incidents
 - Roadway weather observations
 - Hazardous driving conditions and roadway or lane closures or blockages
 - Travel time information (metropolitan areas)
 - Information accuracy
 - Information availability

RTSMIP – The Details

- Provisions for traffic and travel conditions reporting
 - May be established using:
 - Legacy monitoring mechanisms
 - A statewide incident reporting system
 - New monitoring mechanisms
 - Value-added information products
 - A combination of monitoring mechanisms and value-added information products

RTSMIP – The Details

- Data quality
 - States shall develop the methods by which data quality can be ensured
 - States shall receive FHWA's concurrence that methods provide reasonable checks of the quality of the information made available

RTSMIP – The Details

- Participation
 - Highway agencies
 - Public safety agencies
 - Transit operators
 - Other operating agencies necessary to sustain mobility
- Update of Regional ITS Architecture
 - Determine whether Regional ITS Architectures explicitly address real-time highway and transit information needs and the methods to meet such needs
 - If necessary, Regional ITS Architectures shall be updated to address coverage, monitoring systems, data fusion and archiving...

200,000+ Miles Available For Viewing at INRIXTraffic.US FOR FREE

INRIXTraffic.US – What Is It?

- Public-private partnership available to all public sector agency staff and operations contractors
- Register at <http://inrixtraffic.us/Register.aspx>
 - Takes about 24 hours to approve your account, so it is not like signing up for a “regular” website.
- Please tell your partners – City, County, MPOs, fire, police, emergency management, etc.

Create New Account

INRIX Traffic.US is a free service open to all public agency employees - and their onsite contractors - who manage any part of the nation's limited access road network. Accounts will be approved for these employees only - it is not available to the general public. Your account requires approval from INRIX and could take up to 24 hours for activation. Once approved you will receive a confirmation email and will then be able to access the site. If you registered with a non-agency email address (example: Yahoo, Gmail, Hotmail), your registration will be delayed.

INRIXTraffic.US – Coverage

INRIX Core Coverage – 2,017 centerline miles

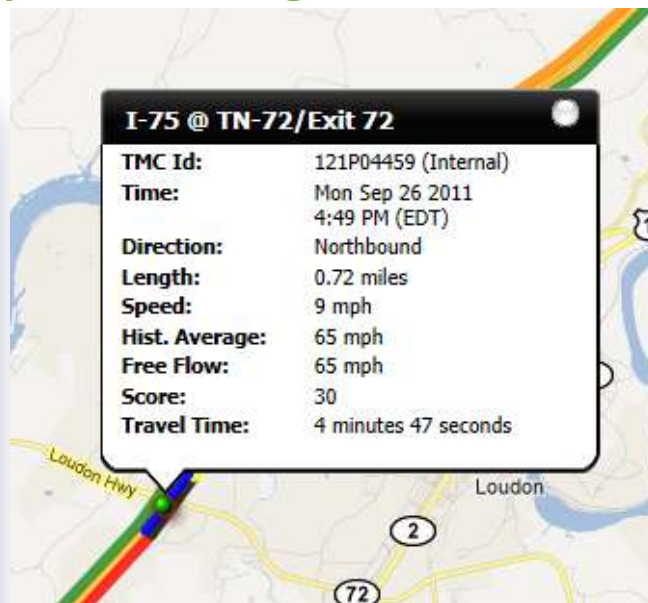

INRIX Core Coverage – 192 centerline miles

INRIXTraffic.US

First Free Traffic Operations Service for Transportation Agencies Nationwide

- Over 700 agency personnel in over 45 states accessing the site
- Unique access to traffic flow data in cities, statewide & across state lines
 - Provides a complete, real-time picture of current traffic speeds and confidence parameter for 200,000+ miles of roads nationwide
 - Provides statewide and over-the-border views of traffic flow of value particularly in times of crisis or during heavy travel periods
- Used daily / weekly by most agencies
- Agencies say data reflects actual conditions and is useful to them
- Feedback received on suggested improvements
 - Updated base map to address some items
